SAEED AL SIRAJ GLASS & ALUMINIUM WORKS L.L.C. | Standard R1 | master 01_Master_Template/ASG_Master_Template.dxf (sha256 3d52e9d49849833c...) | tools: ezdxf 1.4.4, LibreOffice 24.2.7.2 420(Build:2) | CAD software found: none | 10.10.2026

Summary: PASS 167 | PARTIAL 1 | UNVERIFIED 19 | FAIL 2. AutoCAD was NOT available: no test below ran inside AutoCAD. PASS = tested by re-opening the saved file; PARTIAL = tested with a non-AutoCAD renderer; UNVERIFIED = needs AutoCAD (the installer's ASG-QA and standards PDF section 17 cover each one); FAIL = test failed or deliverable missing.

FAIL items: Deliverables: ASG_Master_Template.dwt generated natively; Deliverables: ASG_Master_Template.dwg generated natively

Test procedure

1. Inventory CAD software in the environment (AutoCAD, accoreconsole, ODA, LibreDWG, QCAD, BricsCAD).
2. Build every file from asg_standard.py (build_all.py).
3. Re-open the master with ezdxf recover + audit, strict parse, and LibreOffice Draw as an independent reader.
4. Compare every header variable (incl. current dimension variables), layer, linetype, text / dim / mleader / multiline style and annotation scale with the definitions.
5. Check page settings, borders, title-block position / scale / attributes / locks, viewport layer / lock / scale / position, ByLayer properties of every sheet object.
6. Check model space empty, no xrefs / underlays / proxies, only title-block blocks, fonts, linetypes, hatch pattern names (acadiso.pat), ISO 128 / 3098 / 216 series.
7. Idempotency: re-run scale injection and layout creation; rebuild and compare; check the generated LISP.
8. Re-open each single-size template and the CTB (binary header + all 255 entries).
9. Separate temporary QA drawing: dimensions of known geometry, viewports 1:20 / 1:5, no-plot objects, lineweight matrix, text heights. Check measured values and displayed precision; render and measure lineweights.
10. Pending in AutoCAD: installer run (ASG INSTALL COMPLETE, ASG-QA 0 FAIL), AutoCAD PDF plot of the QA drawing, annotative scaling test.

Results

Area	Test	Status	Evidence
Deliverables	ASG_Master_Template.dwt generated natively	FAIL	Not generated: no DWG writer in this environment (acad, accoreconsole, ODAFileConverter, TeighaFileConverter, dwg2dxf, dxf2dwg, qcad, librecad, bricscad all absent). Not faked by renaming. The installer saves both in AutoCAD (00_START_HERE.pdf).
Deliverables	ASG_Master_Template.dwg generated natively	FAIL	Not generated: no DWG writer in this environment (acad, accoreconsole, ODAFileConverter, TeighaFileConverter, dwg2dxf, dxf2dwg, qcad, librecad, bricscad all absent). Not faked by renaming. The installer saves both in AutoCAD (00_START_HERE.pdf).

Viewports	QA viewports at 1:20 and 1:5	PASS	[5.0, 20.0]
Plotting	No-plot layers (ASG-CONSTRUCTION, ASG-NOPLOT) excluded from the plot	UNVERIFIED	Plot flags set and re-read (Layers: PASS). The preview renderer ignores plot flags, so the diagonal and 'NOPLOT' text are visible in QA_render_A3 - confirm absence in the AutoCAD PDF (README 6a)
Plotting	Viewport boundaries not plotted	UNVERIFIED	ASG-VIEWPORT is no-plot and 'plot viewport borders' off (PASS); renderer cannot show plot behaviour
Plotting	PDF via DWG To PDF.pc3 + CTB: margins, clipping, lineweights	UNVERIFIED	QA_render_A3.pdf is a preview, not an AutoCAD plot (README 6a)
Annotation scales	Annotative text / dims / mleaders across viewport scales	UNVERIFIED	No DXF library writes annotative scale contexts; test in AutoCAD (README 6b)
Deliverables	ASG_Layer_Register.xlsx written and re-opened (all layers listed)	PASS	
Deliverables	ASG_CAD_Standards.pdf written	PASS	
Deliverables	00_START_HERE.pdf: 2-page picture guide (install + daily use)	PASS	
Deliverables	ASG_CAD_Quick_SOP.pdf: one A4 page, every layer name on it exists	PASS	auto-fitted at 7.9 pt
